

# Jane Goodall

Dame Jane Goodall is a world expert on chimpanzees. She has lived with, studied and worked to protect them for over 60 years.

## Discoveries

Jane was the first person to discover that chimps:

- use and make their own tools
- eat meat
- work together to hunt animals

## Early Life

- Jane was born in London in 1934.
- Her favourite childhood toy was a chimpanzee named Jubilee.

## Work

- Jane travelled to Kenya to work on a friend's farm in 1957.
- She worked as a chimp researcher in Tanzania and observed their behaviour.
- The chimps grew to know and trust her.
- She noticed they had personalities and felt emotions like happiness, anger and sadness.

## Achievements

- Jane still travels the world to teach people about chimpanzees and conservation.
- She has written books about her life.
- Her charity protects wild chimpanzees and educates people about the environment.
- She was named a Messenger of Peace in 2002 for her effort to create a safer world.
