Shape

Larry is facing **South**.
What mistake has Larry made?

"I make a 90 degree turn clockwise.
Then I make a 180° turn
anti-clockwise. I end up facing North."

Reasoning

Miss Parker has calculated $\frac{2}{8} + \frac{6}{9}$.

$$\frac{2}{8} + \frac{6}{9} = \frac{8}{17}$$

What mistake has she made?

Fractions

1. Solve these calculations:

$$\frac{3}{6} + \frac{2}{6} = \frac{\square}{\square}$$

$$\frac{7}{9} - \frac{2}{9} = \frac{\square}{\square}$$

$$\frac{12}{7} + \frac{3}{7} = \frac{\square}{\square}$$

2. Add these fractions together.

Remember: Both denominators need to be the same number before you add them together.

$$\frac{2}{3} + \frac{1}{9} = \frac{\square}{\square}$$

Time

What times are shown on the clocks?

Lunchtime

Home from club

Multiplication

$6 \times 8 = \underline{\quad}$

$10 \times 7 = \underline{\quad}$

$54 \div 6 = \underline{\quad}$

$4 \times 8 = \underline{\quad}$

$12 \times 7 = \underline{\quad}$

$44 \div 4 = \underline{\quad}$

$12 \times 8 = \underline{\quad}$

$1 \times 7 = \underline{\quad}$

$46 \div 46 = \underline{\quad}$

$2 \times 8 = \underline{\quad}$

$7 \times 7 = \underline{\quad}$

$102 \div 1 = \underline{\quad}$
